## FEATURES

- ISO 9002 Quality Certified
- Excellent stability over a wide range of environmental conditions
- CR and CJ types in compliance with RoHS
- CRP and CJP types constructed with AgPd Terminals, Epoxy Bondable
- Operating temperature -55°C ~ +125°C
- Applicable Specifications: EIA 575, IEC 60115-1, JIS 5201-1, and MIL-R-55342G

Those items in a shaded box are also E-24 values and will be marked with the EIA 3 Digit Code.

## VALUE MARKING

For those parts ordered with an E-24 value, the product will be marked with a 3 digit code. For those products ordered with an E-96 value, the product will be marked with a 4 digit code. For those parts which fall under E-96 and E-24 values (e.g. 1K ohm is both an E-96 and E-24 value), the part will be marked with a 3 digit code; 4 digit markings for this type is available upon special request.

## 0603 MARKING CODE for E96 VALUES

By combining a specific two digit number and a letter code, you have a series of numeric/alpha digits that give you the complete (E96) resistance value codes for 0603 size part marking.

## LABEL DESCRIPTION

One side surface of a reel is marked with a label with the following items of information.

1. Chip Resistor
2. Part Number
3. Tolerance
4. Quantity
5. Lot number for production month/year/suffix L\*
6. Manufacturer's name or symbol

\* The suffix "L" indicates that this item is lead free. As of September 2004, all new production items of the series CR and CJ are no longer containing tin/lead (SnPb) terminals; they are lead free and in compliance with Lead Free/RoHS.

The content of this specification may change without notification

## CR-KITS Series, Thick Film Chip Resistor Engineering Kits

This engineering and design kit is a great sales tool, allowing for application testing before ordering minimum quantities. AAC offers a wide assortment of popular chip resistors sizes and tolerances, in addition to a large quantity of each value. The kits are convenient with easy-to-use packaging.

### PACKAGE CONSTRUCTION

- 3 Ring Binder Case Holder
- Plastic pages with slip holders for each value
- Each value is individually identified in a slip holder
- Resistors are packaged on paper tape strips
